

ABSTRACT

A silicone rubber adhesive composition comprising (A)  
5 a heat curable organopolysiloxane composition of the  
addition curing type or peroxide curing type, (B)  
reinforcing silica fines, (C) an adhesive agent, and (D) an  
organosilicon compound having a functional group reactive  
10 with component (A) and a siloxane skeleton incompatible with  
component (A) is easily moldable within a short time by  
injection molding, suitable in primerless molding, and  
bondable with various thermoplastic resins. Integrally  
molded articles in which the silicone rubber adhesive  
composition is firmly bonded to the thermoplastic resin are  
15 obtainable without a need for modification of the resin.
